Project Title: Online Job Portal

Front End Tool: HTML5, CSS3(Bootstrap), JavaScript

Back End Tool: PHP, MySQL

Abstract

The Online Job Portal is a beginner-level project designed to connect job seekers with employers. This platform will allow users to create profiles, search for job openings, and apply to jobs directly. Employers can post job listings and manage applications. The system focuses on providing essential functionality for both job seekers and employers, with a straightforward interface and basic filtering options to ensure ease of use.
